

# It's Magic!

The all new **Primary Balance Menu Wizard** transforms the way schools can plan their weekly, fortnightly or even monthly menus. Not only is it a quick and easy way to plan which dishes will be served when, but it also offers a full nutritional breakdown, by the day, week, or individual meal!

**The Menu Wizard** supports the successful and popular Primary Balance range of dishes. There are 27 delicious meals in the Primary Balance range, providing ample choice for a varied three week menu cycle. Every dish meets the daily nutritional guidelines recommended by the Foods Standard Agency.

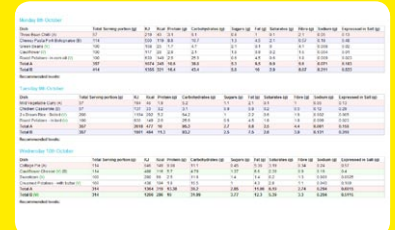

The **Menu Wizard** is an online system, providing secure access to an easy-to-use menu planning tool. Simply drag and drop each dish into a meal slot, and the wizard will do the rest.

Plan to serve more than one portion? Drag another one in to the relevant day and hey presto! The system will work out all the nutritional values.

**The Menu Wizard** will print out your weekly menu and can even produce print-friendly nutritional reports for each dish.

**The Menu Wizard** is provided free of charge to all users of Primary Balance meals and demonstrates our commitment to providing a complete feeding solution for schools.

**Independent taste tests conducted by the Food Technology Advisory Service delivered high scores from primary school children. This is what they said about our award winning Cheesy Pasta Pork Bolognese:**

"It sounded like a mixed food but it was gorgeous 10/10."

"That was lovely. It smelled really good. I liked the pork."

"I liked the taste and the look. It's better than normal pasta."

"It looks nice, smells nice and it tastes lovely. It's the best so far. I liked the cheesy taste."
